In this section: Drug Approvals and Databases How often is the Orange Book updated? Since February 2005, we have been providing daily Electronic Orange Book (EOB) product information for new generic drug approvals. Daily generic updates provide the consumer with the current list of approved generic products which is important for substitution purposes. Previously, a first-time-generic product approved early in the month would not be published in the EOB for several weeks. The monthly EOB update goal is by the end of the following month’s second work week (e.g., November’s EOB will be updated by the end of the second full work week in December). The EOB content includes: New Drug Application (NDA) approvals in the EOB month they were approved. NDA application numbers are preceded with “N” Abbreviated New Drug Application approvals (ANDA or Generic) as of the date of the daily update. Generic application numbers are preceded with “A”. All product changes received and processed as of the monthly update date. Patent information, also updated daily in the EOB, as of the date of the daily update. Exclusivity information updated monthly and current to the date of the monthly EOB update date. How do I obtain the Orange Book? Commencing with the 25th edition, the Annual Edition and monthly Cumulative Supplements have been provided in downloadable Portable Document Format (PDF) at the EOB home page by clicking on Annual Edition. The PDF annual and cumulative supplements duplicate previous paper versions. Over time, there will be an archive for the annuals and each year's December Cumulative Supplement. The downloaded Annual Edition and Cumulative Supplements are also available in a paper version (Approved Drug Products with Therapeutic Equivalence Evaluations, ADP) from the U.S. Government Printing Office: ; toll free 866-512-1800. There are ASCII text files of the Orange Book drug product, patent, and exclusivity data at the Orange Book Information Data Files page. The text files are provided in eobzip.exe and eobzip.zip format. The files are updated concurrently with the monthly cumulative supplements. Also, the annual Orange Book Edition Appendices A, B, and C in PDF format are updated quarterly. How Do I use the Electronic Orange Book to find approved generic drugs? First, if you have the trade name, search the Electronic Orange Book's Rx or OTC section using the Proprietary Name search. This determines the ingredient(s). Then use the Ingredient Search for all approved products that contain the ingredient(s). The resulting list will provide approved products by dosage form and route. For each Dosage Form; Route grouping, there will be a Reference Listed Drug (RLD) that is the innovator product. One or more strengths will have a "Yes" RLD. If there are approved generic products of another firm, the RLD will be "No" and all the products within the Dosage Form; Route grouping will have a Therapeutic Equivalence Code (TE Code). Products that have been discontinued are in the Discontinued section and do not have RLD or TE Codes. The OTC Section products are not evaluated for therapeutic equivalence. Refer to the EOB home page preface for discussion and definitions of the TE Code and Reference Listed Drug (RLD). In the Orange Book, there are links on column headings that will link to the definition of the term. back to top I want drug information not found in the Orange Book. How do I go about getting it? To calculate the overall star rating and percentage breakdown by star, we donâ€™t use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness. It's the perfect book to find in your library, not just because it feels meta, but because this is a browsing kind of book. I would never sit down to read this book cover-to-cover because it's a collection of questions from the NYPL archives. I'm not sure I would want to own it.Several years ago, New York Public Library staff discovere I came across Peculiar Questions and Practical Answers: A Little Book of Whimsy and Wisdom from the Files of the New York Public Library in my own public library. It's the perfect book to find in your library, not just because it feels meta, but because this is a browsing kind of book. I would never sit down to read this book cover-to-cover because it's a collection of questions from the NYPL archives. I'm not sure I would want to own it.Several years ago, New York Public Library staff discovered a box filled with file cards of written questions submitted to librarians from the 1940s to 1980s. Not all peculiar questions have practical or witty answers, but they went into the archive to select those that the staff felt were peculiar and that had interesting answers.I doubt that you have had most of these questions yourself, but wondering if anyone has a copyright on the Bible does make sense to me as a question someone might have in mind.Barry Blitt, known as an illustrator for The New Yorker, created great watercolors for many of the questions."May a funeral be held on July 4th?""Can you keep an octopus in a private home?""In what occupations may one be barefooted?""What does it mean when you’re being chased by an elephant?""Can you give me the name of a book that dramatizes bedbugs?""What time does a bluebird sing?""How much did Napoleon's brain weigh?""How many seeds are in a watermelon?""What does it mean when you’re being chased by an elephant?""What kind of apple did Eve eat?""What is the life cycle of an eyebrow hair?""How many neurotic people are there in the U.S.?""In what occupations may one be barefooted?""What time does a bluebird sing?""What does it mean when you’re being chased by an elephant?""What kind of apple did Eve eat?""How many neurotic people are there in the U.S.?”Have you ever wondered about these kinds of things? I guess you should dip into this book. ...more If you have ever played the 21 questions game, you’ll know that people really can open up when they answer the questions you ask. So why not use questions to sell books?Interesting questions make people think, funny questions make people laugh, and a good question demands a logical answer.By playing this game, you learn how powerful a great question can be.There is a natural, almost irresistible, attraction to answering a list of questions.But have you thought about using the power of questions in book descriptions to help you sell more books on Amazon?Don’t tell them the storyReaders will react much better if you ask them a question in a good book description.If you are a published author and you are selling your ebooks on Amazon, you know that your Amazon book description is the hook that should help you market and promote your book.You want people to buy your book. But is it working for you?Your book description is one of your most powerful marketing strategies. But many new Indie authors often write it as an afterthought.A quick three-sentence summary of your story is not going to help you attract potential readers’ attention. You need much more than that.Successful book publishing is about having a book launch and ongoing marketing plan and doing everything you can to ensure that your book ranks.One often overlooked element of these plans is the use of questions in your book description to help you in attracting reader interest and attention.In any form of promotional writing, adding questions helps you to engage a reader.Questions are powerful selling tools. In How to Win Friends and Influence People by Dale Carnegie, he said, “Ask questions the other person will enjoy answering.”If you want to sell your home, sell a car, or even sell a book, think about how you can use questions to engage a potential buyer.Questions work particularly well on social media, blog posts, and even on your author pages.If you have an email list, a question in the email subject line will likely help your opening rate.It’s so easy to doAll it takes is to stop and think for a moment before you post. Can I turn what I want to say into a fun question?For example, if you want to post something about book reviews on a Facebook group, you could say that they are tough to get and give all the reasons why.But if you use a question to start your piece, your group readers are more likely to engage and respond. Do you have any tips on how to get an honest review of a new book?If you are drafting a blog post about writing a novella, you could say that it is possible to write one in a month.It would be easy to detail a step-by-step plan to write 1,000 words a day. Your title could be, How To Write A Book In 30 Days.But a question in the blog post title would work far better.Would You Believe That You Can Write A Book In Only 30 Days?Questions are powerful engagement tools. But how can you use questions in book descriptions?The three question formsYou can choose between three different types of questions to encourage a reader to think for a moment. Each one serves a different purpose.Do you want your potential reader to think, decide or choose?1. The open questionAn open question uses a question adverb, and the response is entirely up to the reader. They need to think about their answer.Where would you travel to in a time machine? What is your all-time favorite movie? Why did you leave your hometown?2. The closed questionA closed question encourages a decision because it can only be answered with a yes or no.Do guys or girls read more? Do you want to visit the future? Are you content and happy to stay in your hometown?3. The choice questionA choice question forces the reader to choose from only two or three limited options.If you had a bad meal at a restaurant, would you return again or stay away? Do you prefer to have your solo time or visit your family? Are you a reader of fiction, non-fiction, or both?Question ideas for a book descriptionYou shouldn’t overdo it when you write book descriptions. Yes, use questions to sell books, but don’t go crazy.But adding one or two questions can make all the difference in gaining a potential reader’s attention quickly.Instead of very quickly scanning your book description and leaving, your question can keep their attention for a few more critical seconds.If they stop for this time and form a response in their head, you will significantly improve your chances of making a book sale.You should also think about the point of view of your questions. Do you want to ask the reader directly or pose a third-person question?21 Question examplesHere are 21 questions for ideas that you can modify and use for your fiction or non-fiction book description to add a little intrigue or mystery.1. She had finally met Mr. Right. What could possibly go wrong?2. Why do the rich always get richer while the poor get poorer?3. Where do you go to hide when you are feeling blue?4. Do you know the three worst questions to ask a guy on a first date?5. How many times does she have to say no?6. Will it be the perfect murder?7. How would you survive alone on a distant planet?8. Do you want to know how to make money from writing exclusive content for magazines? 9. Christelle knows she must make a tough decision. Will she run or face the music?10. Are you ready to be scared to death?11. When you are betwixt and between, do you go for the bottle of wine or the box of chocolates? Or both?12. Does Eric know what he needs to do to fight off a zombie attack?13. She heard a scream, a gunshot, and then silence. What does she do now?14. Do you want to terminate your life as a cubicle warrior and become your own boss?15. Could she fall in love all over again with her ex after 15 years?16. The president has a deep, dark, hidden secret. Who will have the courage to expose the truth and face the consequences?19. Are you ready to move on from the past and create the new you?20. It was love at first sight. But what happens when Mary discovers that Richard is not everything he seems to be?21. What is the best time of the day to commit the absolutely perfect bank robbery?SummaryWhen you work on improving your book description, it has multiple benefits.Not only can you get more attention from book buyers, but you can also help your book search metadata.Every word you write and question you add to your book description is used by an Amazon algorithm to help readers find your book.A longer description, with a sprinkling of questions, will add extra keywords to the metadata for your book.You should always be looking to improve your book’s searchability and adding more metadata through your Author Central page.Do you know that with Author Central, you can make parts of your book description bold or italic? Great for your questions.But if you want an easy way to format your description, you can try the free book description generator from Kindlepreneur.So are you ready to improve your book description and use questions to sell books?
